

PKU PERIFLEX® JUNIOR PLUS BERRY & ORANGE ARE BEING PHASED OUT AT THE END OF 2026

We know choosing a PKU formula is a personal choice and changing formulas can take time. The options below can help you find a new PKU formula you enjoy, on a schedule that works for you.

-  Add orange flavor drops
-  Add berry flavor drops

PKU FORMULA OPTIONS WITH SIMILAR NUTRITION

PKU Periflex® Junior Plus - Plain or Vanilla

Add orange or berry flavor drops for a similar flavor profile

PKU FORMULA OPTIONS WITH SIMILAR FLAVOR

PhenylAde® Essential - Orange Creme or Strawberry

Make a direct switch or create a transition plan (see back)

GMP-BASED PKU FORMULA OPTIONS

PhenylAde® GMP DRINK MIX - Plain or Vanilla

Add orange or berry flavor drops for a similar flavor profile

ADDITIONAL PKU FORMULA OPTIONS

Periflex® Advance - Orange or Unflavored

More protein and less calories per 10 g protein equivalent serving compared to Periflex® Junior Plus

GMP-BASED PKU FORMULAS ARE KNOWN FOR THEIR MILD TASTE AND MAY AID WITH FEELINGS OF FULLNESS

PKU Periflex® Junior Plus Berry & Orange will be available while supplies last. We expect product to be depleted by December 2026.

WE'RE HERE TO HELP YOU FIND A NEW PKU FORMULA YOU WILL ENJOY DRINKING

TRANSITION OPTION 1: THE MULTIPLE FORMULA OPTION

Replace 1 serving per day of your current formula with your new formula until you reach a full transition.

TRANSITION OPTION 2: THE 4 STEP APPROACH

Create a transition plan with your clinic to move to your new formula. This may take time. We are here to support you with samples and mixing tips.

Each step can take 1-2 weeks to aid in a smooth formula transition = 4-8 weeks to full transition

| | | | | | | | | |
|--------|------------------------|--------------------|--------|------------------------|--------------------|--------|------------------------|--------------------|
| STEP 1 | Current Formula 75% | New Formula 25% | STEP 2 | Current Formula 60% | New Formula 40% | STEP 3 | Current Formula 40% | New Formula 60% |
| | _____g | _____g | | _____g | _____g | | _____g | _____g |
| STEP 4 | Current Formula 25% | New Formula 75% | DONE | New Formula 100% | | | | |
| | _____g | _____g | | _____g | | | | |

TRANSITION OPTION 3: THE SLOW AND STEADY

If you struggle with change, create a slow plan with your clinic to transition to your new formula. This may take more time and we are here to support you with samples and mixing tips.

Each step can take 1-2 weeks to aid in a smooth formula transition = 10-20 weeks to full transition
